1.0 INTRODUCTION

Zambia Revenue Authority has implemented Smart Invoice. Taxpayers using approved accounting packages, Point of Sale (POS) and Enterprise Resource Planning (ERP) systems are obliged to comply with the requirement to use Smart Invoice by integrating their systems with Smart Invoice. The integration process shall be done using either vendors or taxpayers' in-house technical teams.

Therefore, this document serves as the User Acceptance Test (UAT) document for integration of the aforementioned systems with Smart Invoice via the Virtual Sales Data Controller (VSDC).

2.0 ASSUMPTIONS

This document is based on the following assumptions:

1. The taxpayer is successfully registered for VSDC on Smart Invoice test environment.
2. The functionalities of the test environment should replicate the production environment.
3. The taxpayer is using the latest version of the VSDC.
4. The vendor has passed the preliminary review process.
5. The taxpayer/vendor has submitted the developer's checklist.

2.1 List of Abbreviations

Abbreviation	Expanded Form
API	Application Programming Interface
ASYCUDA	Automated System for Customs Data
CIS	Certified Invoicing System
ERP	Enterprise Resource Planning
IPL	Insurance Premium Levy
ITX	Income Tax
LPO	Local Purchase Order
MTV	Minimum Taxable Value
PoS	Point of Sale
RRP	Recommended Retail Price
RTX	Rental Tax
RVAT	Reverse Value Added Tax
TL	Tourism Levy
TOT	Turnover Tax
TPIN	Taxpayer Identification Number
UAT	User Acceptance Testing
UNSPSC	United Nations Standard Products and Services Code
URL	Uniform Resource Locator
VSDC	Virtual Sales Data Controller
ZRA	Zambia Revenue Authority

2.2 Acceptance Test Scope

The acceptance test scope includes all commands of the Interface and specifications for both technical and business requirements as shown below.

Interface		Command/Specification
VSDC	PART A – TECHNICAL AND BUSINESS REQUIREMENTS	VSDC Initialisation
		Retrieval of standard codes
		Item Classification Codes
		Item Management – Save Item
		Import Management
		Purchase Management- Smart Invoice Supplier
		Purchase Management- Non-Smart Invoice Supplier
		Sales Management - Save Sales
		Save Item Composition
		Stock Adjustment
		Offline Transactions
	PART B– COMPUTERIZED INVOICING ACCOUNTING PACKAGE VERIFICATION	Details of Accounting Package verification

2.3 Method of Acceptance Test

Follow the test case procedure to check if the expected results are obtained from CIS, VSDC and smart invoice. Record the appropriate result by marking either “*pass*” or “*fail*.”

2.4 Tax Category Codes

Tax Category Code	Tax Category Name
A	Standard Rated
B	Minimum Taxable Value (MTV)
C1	Exports
C2	Zero-rating Local Purchases Order transactions
C3	Zero-rated by nature
D	Exempt
E	Disbursement
ECM	Excise on Coal
EXEEG	Excise Electricity

F	10% Statutory Service Charge
IPL1	Insurance Premium Levy
IPL2	Re-Insurance
RVAT	Reverse VAT
TL	Tourism Levy

Follow the test case procedure to check if the expected results are obtained from CIS, VSDC and smart invoice. Record the appropriate result by marking either “*pass*” or “*fail*.”

PART A TECHNICAL AND BUSINESS SPECIFICATION

TEST CASES LIST

3.1 VSDC Initialization

Case No.	T01A		
Test Purpose	This case is used to test the initial handshake between the CIS and Smart Invoice through the VSDC.		
Pre-requisites	1. CIS should be integrated with VSDC.		
Test Procedure	1. The CIS or API testing tool (e.g. Postman) makes a request to the VSDC in the prescribed format with the following fields: • TPIN, Branch ID, and Device Serial Number. 2. Smart invoice responds with Taxpayer details, including the Taxpayers Name, branch details, as well as security keys which will be used for authentication of the device via VSDC. 3. ZRA officer checks the status of the VSDC on Smart Invoice.		
Test Verification	The status of the device should read “Activated”.		
Verifier		Result	☐ Pass ☐ Fail
Remarks			

3.2 Retrieval of standard codes

Case No	T02A		
Test Purpose	To ensure that the CIS can retrieve the Standard Codes from Smart Invoice, which are either mapped or stored locally for subsequent use in interactions with the VSDC.		
Pre-requisite	1.The CIS should be initialized. 2.The VSDC should be active. 3.The Codes should be predefined on smart invoice.		
Test Procedure	The CIS makes a request to retrieve the codes from smart invoice through the VSDC.		
Test Verification	1.The CIS should successfully retrieve and store the codes. 2.The retrieved codes should be either mapped or stored locally for utilization in subsequent interactions. 3.Request and response is shown in the smart invoice logs.		
Verifier		Result	☐ Pass ☐ Fail
Remarks			

3.3 Item Classification Codes

Case No.	T03A		
Test Purpose	To ensure that the item classification codes are uploaded to the CIS.		
Pre-requisites	1.The CIS should be initialized. 2.The VSDC should be active. 3.The Item Classification Codes should be predefined on smart invoice. 4.The item Classification Codes are available in excel.		
Test Procedure	1.The CIS should make a call to retrieve the codes from Smart Invoice or the Tester uploads the items Classification Codes document to CIS.		
Test Verification	1.The CIS should successfully retrieve and store the item classification codes. 2.Request and response is shown in the smart invoice logs. 3.The CIS should be able to utilize item classification codes.		
Verifier		Result	☐ Pass ☐ Fail
Remarks			

3.4 Item Management – Save Item

Case No	T04A – Business Part		T04A– Technical Part	
Test Purpose	1. To ensure that the CIS is able to save and transmit product and service items with the required data fields.			
Pre-requisite	1. The item classification and standard codes must be stored and mapped on the CIS.			
Test Procedure	1. The user adds items for all different Tax categories.			
Test Verification	1. The saved items must contain the following data fields; a) Item Code b) Class Code (UNSPSC) c) Item Name d) Item Type e) Country of Origin f) Package Unit g) Unit of Measure h) Selling Price i) Applicable Tax Category j) RRP for MTV products		1. The saved item(s) should be viewable on the CIS and smart invoice. 2. The codes passed align with the provided codes in the select codes API 3. Request and response is shown in the smart invoice logs.	
Verifier				
Result	☐ Pass	☐ Fail	☐ Pass	☐ Fail
Remarks				

3.5 Import Management – Get and update Imports

Case No	T05A – Business Part		T05A– Technical Part	
Test Purpose	1. To ensure that the CIS is able to retrieve and save the imported items from smart invoice.			
Pre-requisite	1. The imported items should have been shared from ASYCUDA to smart invoice.			
Test Procedure	1. The CIS makes a request to retrieve imported items from smart invoice through the VSDC. 2. The user approves the retrieved imported item(s). 3. The user updates the quantities accordingly. 4. The user rejects the retrieved imported item(s).			
Test Verification	1. The imported items are saved on the CIS. 2. The quantities for the imported items are adjusted accordingly on both the CIS and Smart Invoice.		1. The CIS should successfully retrieve and save the imported items. 2. Request and response is shown in the smart invoice logs. 3. The CIS updates the status of the import item(s) upon approval or rejection. 4. The quantities for the imported items are adjusted accordingly on both the CIS and Smart Invoice.	
Verifier				
Result	☐ Pass	☐ Fail	☐ Pass	☐ Fail
Remarks				

3.6 Purchases Management (Supplier on Smart Invoice)

Case No	T06A – Business Part		T06A – Technical Part	
Test Purpose	1. To ensure that the CIS can retrieve and save purchases from smart invoice.			
Pre-requisite	1. The supplier and purchaser must be registered on Smart Invoice.			
Test Procedure	1. The supplier issues an invoice to the purchaser with the required details. 2. The CIS makes a request to retrieve purchases from smart invoice through the VSDC. 3. The user either approves or rejects the purchases retrieved from Smart Invoice.			
Test Verification	1. The purchase details are shared with the purchaser. 2. The quantities for the purchased items are adjusted accordingly on both the CIS and Smart Invoice.		1. The CIS should successfully retrieve and save the purchases. 2. Request and response is shown in the smart invoice logs. 3. The CIS updates the status of the purchases upon approval or rejection. 4. The quantities for the purchased items are adjusted accordingly on both the CIS and Smart Invoice.	
Verifier				
Result	☐ Pass	☐ Fail	☐ Pass	☐ Fail
Remarks				

3.7 Purchases Management (Supplier not on Smart Invoice)

Case No	T07A – Business Part		T07A – Technical Part	
Test Purpose	1. To ensure that the CIS can save purchases from a non-smart invoice supplier.			
Pre-requisite	1. The purchaser must be registered on Smart Invoice. 2. The supplier invoice must be issued outside Smart Invoice.			
Test Procedure	1. The supplier issues an invoice to the purchaser with the required details. 2. The user processes the purchase invoice onto Smart Invoice.			
Test Verification	1. The purchase invoice is saved on Smart Invoice.		1. The purchase details are saved on the CIS and transmitted to Smart Invoice. 2. Request and response are shown in the smart invoice logs. 3. The purchased item(s) quantity on both the CIS and Smart invoice are adjusted accordingly.	
Verifier				
Result	☐ Pass	☐ Fail	☐ Pass	☐ Fail
Remarks				

3.8 Sales Management – Save Sales

Case No	T08A – Business Part	T08A – Technical Part
Test Purpose	1. To ensure that the CIS is able to record and transmit sales transactions to smart invoice.	
Pre-requisite	1. The TPIN used for testing must be registered for all eligible Tax types on Smart Invoice. 2. Each VAT tax category must be mapped to at least one item. 3. For MTV sales; 4. MTV products must be stocked-in with the selling price both below and above RRP. 5. For LPO sales; 6. The Taxpayer must be in possession of a valid LPO Certificate. 7. Standard-rated items must have been stocked in. 8. For Export sales; a) Standard-rated items must have been stocked in. b) The place of delivery for the goods or services should be outside Zambia. 9. For RVAT sale; a) The principals must be registered on TaxOnline.	
Test Procedure	1. The user generates a B2B normal sale for items with the following tax categories: (A, B, C3, D, E) 2. The user generates a normal sale for items with a cash discount with the following tax categories: (A, B, C3, D, E) 3. The user generates a normal sale for items with a trade discount with the following tax categories: (A, B, C3, D, E) 4. The user generates a normal forex sale for items with the following tax categories: (A, B, C3, D, E) 5. The user generates a normal sale for two MTV items at the price below RRP and above RRP. 6. The user generates an LPO invoice for items with the following tax categories: (A, B, C3, D, E) 7. The user generates an Export invoice for items with the following tax categories: (A, B, C3, D, E) 8. The user generates a normal sale for A TPIN registered for Excise on Electricity. 9. The user generates a normal sale for A TPIN registered for Excise on Coal. 10. The user generates a normal sale for A TPIN registered for TOT. 11. The user generates a normal sale for A TPIN registered for ITX. 12. The user generates a normal sale for A TPIN registered for RTX. 13. The user generates a full credit note for a normal sale, LPO sale and Export sale. 14. The user generates a partial credit note for a normal sale, LPO sale and Export sale. 15. The user generates a debit note if the debit note feature has been implemented.	

Test Verification	1. All normal sales invoices are issued with the correct tax computations and reflect the customer TPIN and name. 2. The quantities of the affected items will adjust accordingly on both CIS and Smart Invoice. 3. For Forex transactions; a) The Kwacha amount transmitted to Smart Invoice corresponds to the set exchange rate. 4. For LPO invoices; a) The LPO Number should reflect on the invoice printout. b) The invoice amounts should be exclusive of tax. 5. For Export invoices; a) Country of destination reflects on the tax invoice. b) The invoice amounts should be exclusive of tax. The invoice print outs should have the following features: 1. Clients TPIN, Registered Name, and address reflect on the tax invoice, tax credit note and debit note. 2. On the tax invoice, the following must reflect: a. The words ‘tax invoice’ displayed in a prominent place; b. the registered supplier’s TPIN, name, and address displayed; c. the invoice issue date displayed; d. the invoice number displayed in the format INVSDCNUMBER/INVOICE NUMBER; e. the customer’s TPIN, name and address displayed, where applicable; f. a description sufficient to identify the goods or services supplied which includes;	1. For Forex transactions, the set exchange rate and currency code have been transmitted to Smart Invoice. 2. For LPO invoices, the correct LPO Number has been transmitted to Smart Invoice. 3. The sales transactions reflect on both the CIS and Smart Invoice. 4. The quantities of the affected items adjust accordingly on both CIS and Smart Invoice.
--------------------------	--	---

	g. the quantity of the goods or the extent of the service supplied h. the price of the goods or services i. the tax exclusive amount charged for each description of goods and services supplied j. the Tax rate(s) displayed 1. Tax information; k. the total amount charged on the invoice, exclusive of tax displayed, l. the rate and amount of discount given if any is displayed, m. the total tax charged is displayed, n. the total amount charged on the invoice, inclusive of tax is displayed. 2. SDC information; a) QR Code OR URL, b) SDC ID, c) VSDC date, d) Internal data and Fiscal signature. 3). Foreign Currency Invoices must show currency Notation and exchange rates. 4. Tax Credit Note must reflect all features of the Tax Invoice but must read “Tax Credit Note” with the following additional features: a. Original Invoice number for the transaction being reversed. These are for cross-referencing and must be clearly labeled. b) Reason for reversing a transaction must reflect on the credit note. c) the credit note number displayed in the	
--	---	--

	format CRNSDCNUMBER/CREDITNOTE NUMBER;			
	d) Amount of the credit. 5. Debit Note must reflect all features of the Tax Invoice but must read “Debit Note” with the following additional features:			
	a. Original Invoice number for the transaction being adjusted. These are for cross-referencing and must be clearly labeled. b) Reason for the adjusting the transaction must reflect on the debit note. c) the invoice number displayed in the format DBTSDCNUMBER/DEBITNOTE NUMBER; d) Amount of the debit.

3.9 Save Item Composition (Optional)

Case No.	T09A		
Test Purpose	1. To ensure that the CIS is able to send and save items utilized in processing or repackaging procedures.		
Pre-requisites	1. The CIS should be initialized. 2. The VSDC should be active. 3. The item(s) should be saved on the CIS.		
Test Procedure	1. An item(s) is processed or repackaged.		
Test Verification	1. 1.The processed or repackaged item(s) should be saved and the quantities are adjusted accordingly. 2. 2.The raw material or the initial package quantities are adjusted accordingly. 3. 3.Request and response is shown in the smart invoice logs.		
Verifier		Result	☐ Pass ☐ Fail
Remarks			

3.10 Stock Adjustments – Save Stock Item – Save Stock Master

Case No	T10A – Business Part		T10A – Technical Part	
Test Purpose	1. To ensure that the CIS is able to adjust and correctly transmit stock quantities for all types of adjustments.			
Pre-requisite	1. The Stock item must be registered on the CIS.			
Test Procedure	1. The user makes the following stock adjustments; 2. Adjustment In and Out 3. Branch Transfer In and Out 4. Processing In and Out 5. Disposals			
Test Verification	1. Item stock quantities adjusted accordingly on Smart Invoice under the following stock management sub-menus; 2. Stock Inventory 3. Stock In history 4. Stock Out history 5. Stock Opening/Closing		1. Request and response is shown in the smart invoice logs. 2. The correct sarTyCd, quantities and reason for adjustment are passed in accordance with the invoking process. 3. The reconciled stock balance is posted after the adjustment is made.	
Verifier				
Result	☐ Pass	☐ Fail	☐ Pass	☐ Fail
Remarks				

3.11 Offline Transactions

Case No	T11A		
Test Purpose	1. This case is used to test whether the CIS can process transactions whilst the VSDC is offline.		
Pre-requisite	1. Service where the VSDC is hosted must be disabled.		
Test Procedure	1. The taxpayer must shutdown the service where the VSDC is running 2. The taxpayer processes a sales transaction 3. The taxpayer re-enables the service where the VSDC is running 4. The taxpayer again processes a sales transaction		
Test Verification	1. Invoice should not be created on the CIS 2. The invoice should be created in scenario 2		
Verifier		Result	☐ Pass ☐ Fail
Remarks			

PART B: COMPUTERISED INVOICING ACCOUNTING PACKAGE VERIFICATION

4.1 Details of Accounting Package Verification:

REF	QUERY / PARAMETER CHECK	YES (tick) ✓	NO (tick)
1	Confirmation that invoice numbers uniquely and system generated		
2	Confirmation that invoice numbers are consecutive		
3	Confirmation that the user CANNOT manipulate invoice numbers once initialized/posted		
4	Confirmation that the tax invoice has the minimum required features as follows:		
	(i) the words 'tax invoice' displayed in a prominent place;		
	(ii) the registered supplier's name, and address;		
	(iii) registered supplier's taxpayer identification number;		
	(iv) the date of issue of the invoice;		
	(v) the number of the invoice taken from a consecutive series;		
	(vi) the customer's name and address;		
	(vii) the customer's Taxpayer Identification Number;		
	(viii) a description sufficient to identify the goods or services supplied which includes the quantity of the goods or the extent of the service supplied, the tax exclusive amount charged for each description of goods and services supplied and the rate or rates		
	(ix) of tax; and indicate: -		
	☐ the total amount charged on the invoice, exclusive of tax;		
	☐ the rate and amount of discount given if any;		
	☐ the total tax charged; and		
	☐ the total amount charged on the invoice, inclusive of tax		
5	Confirmation that the user CANNOT amend or edit the invoice details once the invoice has been printed		

6	Confirmation that the user CANNOT delete the invoice details once the invoice has been printed		
7	Confirmation that the user CANNOT re-print the ORIGINAL invoices with same details without showing them as copy/duplicate invoices		
8	Confirmation that the system has an audit trail showing original details and any amendments made		
9	Confirmation that the system provides basic VAT transaction reports showing invoice number, invoice date, customer name, description of goods/services, value of goods/services and VAT amount		
10	Confirmation that the data files CANNOT be accessible via third party packages		
11	Confirmation that there is a provision for a backup in case of a power/system failure		
12	Confirmation that there is user authentication through provision of user level passwords		
13	Indicate / List down any management reports produced by your system 1. 2. 3. 4. 5.		
14	Confirmation that the system is able to produce excel / Access spreadsheets of the VAT Input Schedules in soft copy format with details as in (9) above.		
15	Confirmation that the system generates credit notes with features of a tax invoice		
16	Confirmation that the system Does NOT allow users to access the data tables for editing directly or via third party applications		
17	Confirm whether the products of this system feed into another system.		
18	If yes to Query 17, then confirm whether this is done directly		
19	If yes to Query 17, confirm the editing, manipulation and deletion restrictions described in number 3, 5 and 6 above apply.		
20	Confirm whether manual invoicing will be used alongside the computerized package, upon approval.		

REF	QUERY / PARAMETER CHECK	YES (tick)	NO (tick)
